Education

- **Dayananda Sagar College Of Engineering** — Bengaluru, India
  Affiliated to VTU — B.E. in Computer Science —— CGPA: 9.45/10 — *2025 – 2029*
- **Doon International School** — Dehradun, India
  Class 12 — 93.4%
- **Summer Valley School** — Dehradun, India
  Class 10 — 96.0%

Skills

- **Languages:** Go, JavaScript, TypeScript, HTML, CSS, SQL, Python
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Tailwind CSS, Pandas, Scikit-learn, Seaborn
- **Databases & Backend:** MongoDB, Supabase (PostgreSQL), Redis, REST APIs
- **Developer Tools:** Git, GitHub, Postman, Vite, Vercel, VS Code

Open Source Contributions

- **Winter of Code – IIIT Kalyani** — Feb 2026 – April 2026
  Contributor
  - Built responsive UI layouts for mobile and desktop compatibility across core portal pages.
  - Implemented user-facing component enhancements including the main authentication/signup workflow.
  - Streamlined user experience on file upload pages by refining interface state transitions.

Projects

- **AnimeVerse:**
  - Built a full-stack anime discovery app using React, Vite, and Tailwind CSS with Supabase Auth and cloud-synced watchlists.
  - Handled external API rate limits (HTTP 429) using custom retry logic with exponential backoff.
  - Secured watchlist user data with Supabase Row-Level Security (RLS) policies and implemented live search and genre filters.
- **SearchAThon:**
  - Developed a full-stack hackathon team discovery platform using Node.js, Express, MongoDB, and Redis caching.
  - Built team creation, member role management, and join request approval workflows with JWT authentication.
  - Reduced API response latency for popular team searches using Redis key-value caching.
- **NetPulse:**
  - Developed a network monitoring and analytics tool to track real-time network activity, ping latency, and connection health.
  - Built an interactive dashboard to visualize network performance metrics and log diagnostic data for troubleshooting.
  - Designed modular backend services to automate periodic health checks and generate network status alerts.
- **Football Rating Predictor:**
  - Built a machine learning pipeline using Python, Pandas, and Scikit-learn to model EA Sports player rating distributions.
  - Trained and fine-tuned a Decision Tree Regressor on over 14,000 player statistics.
  - Achieved a 94.4% R-squared score and a Mean Absolute Error of 1.16 on overall rating predictions.

Achievements

- **Finalist** at AWS AI for Bharat Hackathon – 2026
- **Runner Up** at TechnoSeek held at DSCE – April 2026
- **Track Winner** at HackNocturne 2.0 Hackathon – March 2026
- **Top 10 Contributor** at Winter of Code (IIIT Kalyani) – 2026
