  Class 10 — *2022*

Skills

- **Languages**: C,C++,HTML,CSS,JavaScript,Node.js,Typescript
- **Frameworks** :React,Tailwind,ExpressJS,MongoDB
- **Tools** :VS Code,Git,Github,Postman

Projects

- **AnimeVerse (Link)**:
  A React-based web application that allows users to explore currently airing and top-rated anime using real-time data from the Jikan API. It includes features such as anime search by title, pagination for browsing results, responsive Tailwind CSS styling, and anime cards displaying posters, titles, types, and statuses, with navigation handled through React Router.
- **Expense Tracker**: I built an Expense Tracker using the MERN stack that lets users add, view, and manage expenses with details like title, amount, category, and date. The app displays expenses in a clean table and automatically calculates the total. It features a simple, modern UI and demonstrates my ability to develop full-stack applications using React, Node.js, Express, and MongoDB.
- **Stone Paper Scissor (Link)**: A simple interactive game built using React, Tailwind CSS, and Vite, where the player competes against the computer's random choices. It instantly declares the winner, shows both player and computer selections through a dynamic UI, supports reset/play-again functionality, and features a clean, responsive design.
- **SearchAThon (Link)**: A platform where you can find team mates for you hackathon team filtering out by roles, location and much more.
